Allowable Subject Matter

1. Claims 2-9, 11-21 and 23-33 allowed.
2. The following is an examiner's statement of reasons for allowance: the present invention contains two elements whose functionality and interaction are distinguishable over the prior art. The primary reason for allowance is the interaction of the first element, the utilization of a format to distribute and communicate a message to local components within a mobile device, with the second element, the mapping of the format to a second native storage format. These elements are distinguishable because the prior art references were directed towards an external device, such as a gateway, that performed format mappings for mobile devices and were not involved with the internal mapping functionality within a mobile device that is being claimed in the the present invention.

The interaction of the transport component, the messaging component, the data store and the storage component to distribute a message within a mobile device in a first format, that is different from a transport protocol used to deliver the message to the mobile device, and to subsequently map the message to a second format is novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
